

INTERN POSITION ANNOUNCEMENT

MERCATOR LAND SURVEYING, LLC

Mercator Land Surveying, LLC is a boutique Manhattan-based land surveying firm specializing in large-scale real estate development, industrial, master plan, environmental and park design work. Our clients include engineering, architecture, construction, planning, and real estate firms and government agencies.

Our projects include boundary, topographic, utility and scanned surveys for: public works, subways, tunnels, parks, wetland mitigation, and brown field remediation.

We offer the opportunity to work closely with the principal of the firm and cutting edge technology in the engineering field, such as a Leica 3D high-definition laser scanner!

We are looking for a student or recent graduate with substantial CAD skills with the ability to work independently, to think creatively and proactively, and may be interested in pursuing a career in Land Surveying.

This position has flexible hours and can transition into a full time position.

Requirements:

Proficiency with AutoCAD

Knowledge of Civil 3D and animation programs a plus!

We will rely on you to:

Create and review CAD drawings

Produce utility structure sheets

Perform site field work

Make requests to various city agencies for plans and documentation

Model in 3D using data collected with a 3D high-definition scanstation

E-mail resume **with cover letter** (shows evidence of your excellent writing skills!) to mctr.hr@mercatorgroup.com.
